Interior View Church

The Church of the Transfiguration is one of the most famous parishes of the Episcopal Church in the United States. Known as "The Little Church Around the Corner," for one hundred and fifty years it has welcomed all classes and races and has been a very visible place of worship in an idyllic urban setting. Our firm has been retained to complete a restoration Master Plan which will determine the extent of the preservation work required.

The completed project will allow this National Historic Landmark to continue its mission into the next century with a reception hall, auditorium, offices, classrooms, and a music practice studio for its famous Boy's Choir.
